Workshop eyes leisure in transition

The Fifth Annual Post Congress Workshop of the District of Columbia Recreation and Park Society was held earlier this month at Gallaudet, attracting 235 area recreation professionals and students.

Held Nov. 3 and 4 at the Field House, the workshop was conducted two weeks after the National Recreation and Park Association's conference in Kansas City to share with local professionals and recreation students information from the national conference.

Entitled "Leisure in Transition," the workshop centered on the changes in leisure and the responsibilities of leisure professionals in a high technology era, according to Jimmy Calloway, a Physical Education professor at Gallaudet and president of the District of Columbia Recreation and Park Society. Calloway organized the workshop, held for the second year at the College.

A student day was held Nov. 3 and was attended by recreation majors from Gallaudet College, George Washington University, Howard University and the University of the District of Columbia. Discussion topics on that day focused on non-traditional opportunities for future park and recreation professionals, military recreation, correctional recreation, commercial recreation and travel and tourism.

Recreation professionals from the D.C., Maryland and Virginia area attended the following day's workshop. That workshop featured Ira Hutchinson, director of the Office of Historically Black College and University Programs in the Department of the Interior. Hutchinson discussed ways to meet the challenge of transition. Harry Cordellos, billed as the world's greatest

blind athlete, was the workshop's keynote speaker.

Cordellos, 47, is an exhibition water skier, marathon runner and cross country skier.

In town to run in the Marine Corps Marathon, Cordellos spoke about attitude, about how he was told while growing up that because of his disability he couldn't do many things. "If someone had told me 30 years ago that I would run 26 miles, I would have thought they were crazy. When someone tells you for 20 years that you can't do something, you believe it."

Life for Cordellos changed on Aug. 17, 1958. On that day, he water skied. "Life changed for me that day. I thought, 'Even if I'm blind, I'm a water skier.' After that, nobody ever again said, 'You can't.' Instead, I said to myself, 'Don't be afraid, you can do it' and people said, 'Go for it,'" Cordellos recounted.

He maintained that "you can get around a physical disability" but you "can't get around a mental disability—a bad attitude."

Cordellos indeed has "gotten around" his disability, and he urged those in attendance to reach as far as they possibly can. "To me, there's a real difference between failing and being a failure. The loser isn't the one who comes in last—it's the one who never entered the race."

Also speaking during the workshop were three Gallaudet employees: Gina Oliva, Sharon Davis and Maria Waters. Oliva, director of Intramurals and Campus Recreation, spoke about how to include deaf participants in aerobic dance lessons. Davis, dance club instructor in the Physical Education Department at

National conference makes blueprint for the future of women's sports

by Joni Johns

A virtual "Who's Who" in women's sports heard the special concerns of deaf female athletes as representatives from Gallaudet and the U.S. Committee for the 1985 World Games for the Deaf made themselves known at The New Agenda National Conference on the status of women's sports. Held Nov. 3-6 at the Capitol Hilton, the conference was sponsored by the Women's Sports Foundation (WSF) and the United States Olympic Committee (USOC).

"Resolutions were passed that specifically include female deaf athletes and I feel very confident that something will come of it," said Becky Clark, a student teacher at the Model Secondary School for the Deaf who captured a silver medal as a member of the women's volleyball team competing in the 1981 World Games.

Tennis star Billie Jean King, WSF president Donna De Varona, who was an Olympic gold medalist in swimming, astronaut Sally Ride, USOC president Bill Simon and other national women's sports officials and athletes were among the luminaries who listened as delegates Clark and Patricia Cinelli, representing the U.S. 'Deaf Olympic'

Committee and Kitty Baldrige, Gallaudet women's athletic director, voiced the particular needs of hearing impaired female athletes.

"Some of the delegates and speakers had never come in contact with a female deaf athlete before," explained Clark. "They continued to use the phrase physically handicapped and we had to make clear the difference between physically handicapped and deaf as well as between the words handicapped and disabled."

Yet through their efforts and because of the willingness of conference organizers and delegates to listen, many resolutions were modified to include the word 'disabled'.

Echoing Clark's sense of accomplishment, Baldrige said, "In a forum like this where everyone comes in with an open mind, I think people are much more receptive to ideas that are not their own. In this case, I think it was true that people were more sensitive to all women of difference whether that was due to a sensory impairment, physical disability or racial background."

Ten Gallaudet athletes attended the opening session of the conference, but did not vote on resolutions. According

Campus neighbors learning to sign

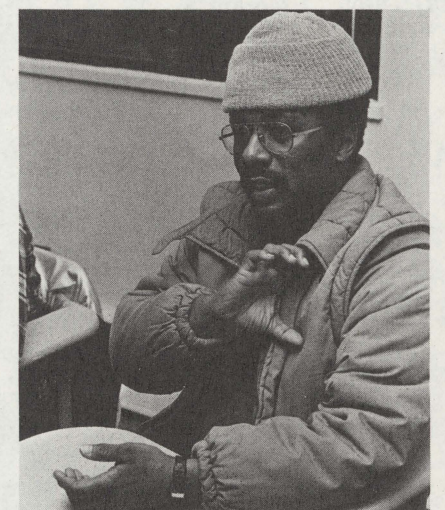

Thirty members of the Shepherd Park community in which the Northwest Campus is situated have started taking sign language lessons in an effort to establish better communication between themselves and Gallaudet students.

The pilot program offered at the Northwest Campus got under way Oct. 18, with twice weekly sessions scheduled through Dec. 15.

Of the 30 community members enrolled in the non-credit classes, 11 are Washington, D.C. police officers assigned to the 4th district, of which the Northwest Campus is a part. "We (the police officers) are ecstatic about the class. The teacher is excellent—she makes you want to learn more," said Police Officer Thomas Matthews.

Matthews said he began taking the classes for two reasons: first, because it would help in any dealings he has with Gallaudet students and second, because his wife, Eileen, is an English instructor at the Northwest Campus.

Mary Alice Branch, who resides on Roxanna Road in Shepherd Park, said she had always wanted to learn sign language and was excited about the opportunity to enroll in one of the two

Ron Wallace of the D.C. Police Department learns to sign the word "police" in class.

beginning classes offered. "The enthusiasm hasn't dwindled any—and neither has the challenge," she said, adding that she experiences difficulty with some of the hand movements. "It's a finger doing this or a thumb that sticks out," she said with a laugh.

"I feel like I'll be able to help a stu-

Did you know?

by Corrine Hilton
and David de Lorenzo

Did you know that a deaf man, Erastus "Deaf" Smith, was a spy for the Texas Army in the war against Mexico? A county in Texas was named Deaf Smith County in his honor. Various natural foods have also been named after him.

Did you know that Edward Miner Gallaudet was a founder of the prestigious Cosmos Club as well as the Washington Literary Society? Each president of Gallaudet College since has been a member of the club.

Did you know that Albert Berg, a graduate of Gallaudet College, was the first football coach at Purdue University? The football huddle, by the way, was invented at Gallaudet by a student, Paul D. Hubbard.

Did you know that a deaf man, John W. Cornforth, won the Nobel Prize in chemistry in 1975?

Did you know that Samuel Morse, the inventor of the telegraph, ran his telegraph line across Kendall Green to send out his first message, "What hath God wrought?"?

Did you know that a shorthand system, the Gregg shorthand, was invented by a severely hearing impaired man, John R. Gregg?

Did you know that the first deaf person to earn a college degree in the United States was Melville Ballard in 1866?

Did you know that the Gallaudet College football team defeated Navy, by a score of 16-0? That was in 1886.

Did you know that the first basketball game at Gallaudet was played in 1896 by an all-female team? Male students did not establish a basketball team until 1905.

KDES holds open house this week

Kendall Demonstration Elementary School extends a special invitation to the Gallaudet community to attend the school's open house Tuesday, Nov. 15 from 10 a.m. to noon. The open house is being held to mark American Education Week.

Special exhibits will be set up throughout the building and instructional departments will conduct

demonstrations to illustrate the week's theme: "A Strong Nation Needs Strong Schools." Students will participate in an art contest and writing projects during the week.

KDES will be open for visiting again during school hours on Thursday, Nov. 17.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline	Program
11/28/83	ED: SEP Handicapped Education Training Grants
12/01/83	National Institute of Justice: Unsolicited Research
12/02/83	ED: Minority Institutions Science Improvement Program
12/06/83	HHS: OHDS Social Services Grant Program
12/06/83	ED: Special Services for Disadvantaged Students
12/13/83	ED: FIPSE Comprehensive Program
12/23/83	ED: Field Initiated Research Projects
01/03/84	NEA: National Endowment for the Arts Challenge Grants
02/03/84	National Institute of Education (NIE): Unsolicited Proposals
03/16/84	ED: Student Initiated Research Projects
No Specific Deadline	NSF: Honors Workshops and Materials Development for Pre-College Science and Mathematics
No Specific Deadline	NSF: Information Science and Technology Research Programs
No Specific Deadline	NSF: Presidential Awards for Excellence in Science and Mathematics Teaching

Department of Education accepting applications

The U.S. Department of Education is accepting fiscal 1984 applications for new awards under the Research in Education of the Handicapped Program. Applications will be accepted for two program areas: Student Initiated Research Projects and Field Initiated Research Projects.

Student Initiated Research Projects support postsecondary students completing research projects concerned with education programs for the handicapped. There is \$300,000 in funds available for an estimated 35 new projects in this area. Application deadline is March 16, 1984.

Field Initiated Research Projects support a broad range of research and development projects that fall outside areas of interest to the Department. Appropriate areas of interest are only limited by the mission of the research program, which is to support allied research relating to the education of the handicapped.

Approximately \$2 million will be available in FY 1984 to support an estimated 30 new awards in this program area. Application deadline for Field Initiated Research Projects (84.023C) is December 23, 1983.

For further information, please contact the Office of Sponsored Research. For application forms and program information packets, please write to Allen Dittman, Research Projects Branch, Special Education Programs, Donohoe Building, Room 4839, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202, 472-4640.

Participants in the Fifth Annual Post Congress Workshop of the District of Columbia Recreation and Park Society take part in one of the activities at the Field House.

College hosts recreation workshop

continued from page 1

the Northwest Campus, and Waters, coordinator of Preparatory Activities at the Northwest Campus, discussed adaptive activities in parks and recreation.

Other topics during the workshop included aging, stress management, therapeutic recreation and recreation and sports for persons with spinal cord

injuries.

Future workshops of the District of Columbia Recreation and Park Society will probably be held at Gallaudet because of its central location in the city, according to Calloway.

DRCC continues on official basis

by Mike Kaika

Members of the Deafness Related Concerns Council met with Dr. Johns Nov. 3 to discuss the status of the group under the new administration. Dr. Johns, saying he is familiar with the purpose and aims of the DRCC, said the group could continue on an official basis. He also suggested that the DRCC could serve as a resource group for the College.

The Deafness Related Concerns Council was officially established in March of 1980 as the first deaf advisory group to the President's Office. Soon after its formation, the DRCC set up task forces on deaf employment, orientation, interpreting and physical barriers.

The DRCC grew out of the September, 1979 Professional Day, when day professionals encountered a number of problems such as unreadable transparencies, poor background behind signers and uneven interpreting. Deaf participants got the impression that programs and services tended to be planned for deaf people without their involvement.

The DRCC is composed of six deaf persons from the College and Pre-College and plans are in progress to add another person from the Northwest Campus. Special Assistant to the President Merv Garretson serves as an ex-officio member. All members are elected from among deaf employees.

Between December 1981 and November 1982, the DRCC submitted to the previous administration four lengthy task force reports on interpreting, telecommunication devices for the deaf at Gallaudet, orientation to deafness and deaf people and employment of deaf persons at Gallaudet College.

Present members of the DRCC are: Harvey Goodstein, Ausma Smits, Barbara Kannapell, Janet Weinstock, Susan Searls and Mike Kaika.

Extension events set

Two extension programs planned for this month were not included in last week's On the Green.

Scheduled for Nov. 19, a program entitled "The Deaf Person in a Hearing World" will be presented at the Westchester Independent Living Center in White Plains, NY. The event is sponsored by the National Center for Law and the Deaf.

"IEP for the Dorm" will be held Nov. 26 at the Virginia School for the Deaf/Blind in Staunton, VA. That program is sponsored by Pre-College.

For more information about either event, contact the campus sponsor or the Office of Extension Programs.

Meet the DRCC

The Gallaudet community is invited to meet the members of the Deafness Related Concerns Council on Thursday, Nov. 17 during happy hour (4 to 6 p.m.) at 'Ole Jim'. Campus employees who want to learn more about the group are urged to attend.

Gallaudet College is an equal opportunity employer-education institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

Advocacy Notes

by Merv Garretson
Court Cases

Hearing impaired school bus drivers: In 1982 James Strathie brought a class action suit against the Pennsylvania Departments of Transportation and Education which had suspended the school bus drivers' licenses of all hearing impaired persons. Strathie, who wears a hearing aid, alleged that this action violated his rights under Section 504 of the Rehabilitation Act of 1973, the due process and equal protection clauses of the 14th Amendment and various Pennsylvania statutes.

The U.S. District Court of Eastern Pennsylvania ruled in favor of the state, holding that the new regulation was constitutional since the primary concern of the state agencies was the health, safety and welfare of the school children of Pennsylvania. The state had argued that hearing aids might slip off, break down or have other mechanical problems. Referring to the Supreme Court's decision on the Davis case that an "otherwise qualified" handicapped individual is one who can meet all of a program's requirements in spite of his handicap, the court ruled that Strathie was not otherwise qualified to perform the job. Therefore there was no evidence of discrimination on the basis of handicap.

Strathie and his attorneys appealed the case at the 3rd U.S. Circuit Court of Appeals with some input and consultation from the National Center for Law and the Deaf at Gallaudet. The federal appeals court ruled that Pennsylvania's

reasons for the suspension were invalid and sent the case back to the district court. The court said all the potential problems with hearing aid wearers cited by the state were solvable. It was also observed that school bus drivers' licenses are permissible for people with eyeglasses even though glasses can fall off and break, therefore it was inconsistent to point to "the highest level of safety."

United States vs. Baylor University Medical Center: District Judge Robert M. Hill has ordered the suspension of all federal funds to Baylor University Medical School until it cooperates with the Department of Health and Human Services (DHHS) in its investigation of alleged discrimination against a deaf patient. The deaf woman had alleged that while she was a patient at Baylor she was denied the use of a sign language interpreter even though she paid for the expense herself.

In court the DHHS claimed the Medical Center refused access to its files during the investigation of this complaint. Baylor contended it was not a recipient of federal financial assistance and not subject to Section 504 of the Rehabilitation Act of 1973. However, the judge ruled that the Medical Center was a recipient by virtue of the Medicare and Medicaid benefits which it indirectly received and which constituted federal financial assistance. These benefits and any other federal funds are therefore suspended from Baylor until the Medical Center agrees to cooperate with the DHHS investigation.

Sign language offered to community

continued from page 1

dent who might be in the neighborhood and is in trouble. And, also, it's just a lot of fun," she stated.

The program, officially known as the Northwest Campus Community Sign Language Program, was initiated by Lavarne Hines, Director of EEO and Community Relations, who said the program got off the ground in part because of widespread interest. If the demand continues, she said, beginning level II classes will be offered at the school.

While no such program now exists for the community near the Kendall

Green campus, Hines said similar programs will be offered in the near future. One such class would be offered to interested students at Hamilton Junior High School adjacent to campus.

"The program," Hines said, "serves as a means for people to begin to understand deafness. It offers them an appreciation of sign language and gives them a mode of communication. It also shows the College's willingness to be a good neighbor. The first step to being a good neighbor is communication."

Both sign language classes offered at the Northwest Campus are taught by Elaine Aiello.

Open Season begins for employees

The Open Season for health insurance has begun and will continue through Friday, Dec. 9. During this time, all permanent employees can make changes in their health insurance coverage or sign up for coverage for the first time without restrictions.

Complete information about the changes in health plan coverages for 1984 was not available as *On the Green* went to press. However, when the Personnel Office receives that information, new Plan Comparison Charts

with the 1984 premium costs for each health plan will be printed and distributed via campus mail.

The dates and times for this year's three health benefit fairs are as follows: Nov. 22 from 2 to 5 p.m.; Nov. 23 from 11 a.m. to 2 p.m.; and Dec. 1 from 11 a.m. to 2 p.m.

Anyone with questions about Open Season should contact Kayt Lewis in the Personnel Office at x5113 (voice/TDD).

Becky Clark talks during the women's sports conference with Sally Ride, the nation's first female astronaut. Ride, a former rugby and tennis player, addressed the conference and showed clips of film taken during her space flight.

Future of women's sports discussed

continued from page 1

to Baldrige, the student athletes were especially impressed with Billie Jean King's keynote address.

King challenged everyone present to remember the message of Brown vs. the Topeka Board of Education—that separate but equal is inherently unequal—and suggested the time must come when women will compete with men in athletic endeavors. "That's relevant to deaf athletes, too," Baldrige said. "We do need to think about integrating deaf athletes. I also think the fact that we brought up the issue of communication barriers and what needs to be done really increased awareness of that at the conference."

Nine young women athletes from MSSD participated in the conference's opening ceremonies which also further contributed to the visibility and awareness of deaf female athletes. Almost every session in the four-day conference attended by about 500 delegates was interpreted.

Target issues of the conference ranged from the physiological factors

which affect women's performance in sports to the promotion and public acceptance of women's athletics.

Delegates broke into groups for open debate and discussion of the topics before adopting resolutions which may become a blueprint for women's athletics of the future.

Because the issue sessions offered such an accessible forum, "we were able to make many contacts as well as generally increasing awareness of deafness," Cinelli said.

Clark discussed with De Varona the possibility of the Foundation developing a program to enhance the deaf athlete's potential to compete with hearing athletes. "She was very receptive to the idea," said Clark.

The conference, which is expected to set the tone for the next decade of professional, educational and recreational sports programs for women, supplemented its days of discussion with sports demonstrations, exhibits and speeches by Vice-President George Bush, Sen. Bill Bradley, (D-NJ) and Sen. Ted Stevens (R-AK).

Honorary Education society forming

A chapter of Kappa Delta Pi, the national honorary society in Education, is now being formed at Gallaudet—with the chapter scheduled for installation in February 1984. Kappa Delta Pi, with more than 400 local chapters, is the oldest and largest national honorary society in the United States.

An organizational meeting of charter members (both graduate and undergraduate students who meet the Society's criteria for invitation and faculty in programs which educate students for professional roles in schools) is set for Thursday, Nov. 17 from 6:30 to 8 p.m. in the Red Room of the Cafeteria. At that time, charter members and their faculty advisors will establish programs for the year, organize bylaws and organize other activities for the new chapter.

Designed to honor both students and faculty for achievement in all fields relating to professional work in education, the Society's goals include recognition of outstanding contributions to education by persons who "exhibit commendable personal qualities, worthy educational ideals and sound scholarship, without regard to race,

age, color, religion, sex or handicapping condition."

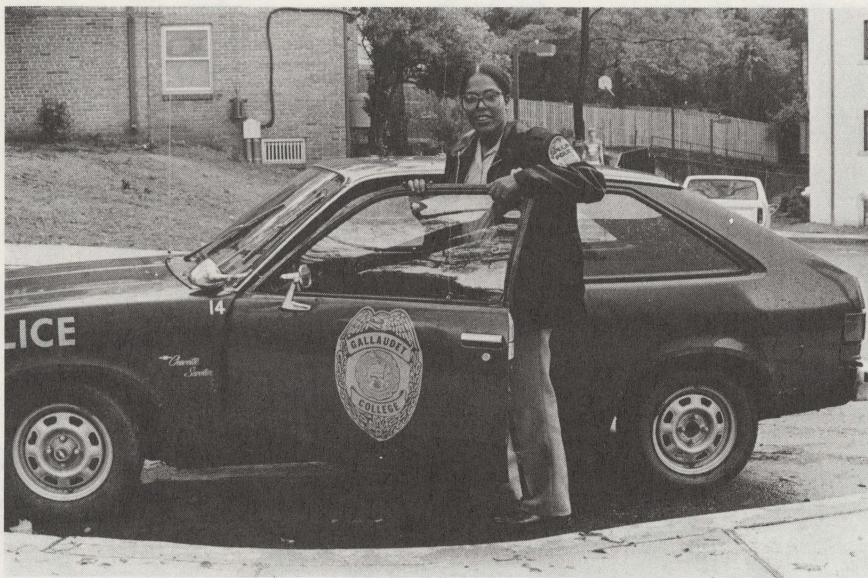

Among the national activities of the Society are scholarship endowments for graduate and undergraduate students and an Outstanding Dissertation Award for doctoral students. In addition, the Society publishes several journals and other professional publications for its members.

Any faculty members or graduate and undergraduate students in Education interested in more information about the new chapter should contact David Martin in the Department of Education at x5400 (voice or TTY).

Lecture and film set

A lecture and movie presentation entitled "The Deaf in Israel" will be held Wednesday, Nov. 16 in the multipurpose room of Ely Center. The presentation, which begins at 7:30 p.m., will feature Israel Sela, an Israeli social worker and doctoral candidate at Gallaudet.

The presentation is sponsored by the Gallaudet Hillel Jewish Student Association.

Debra Howard, a campus police officer with the Department of Safety and Security, at work at the Northwest Campus.

Retreat will focus on sex education

Pre-College Programs will host a weekend retreat at Kendall Demonstration Elementary School Nov. 18-20 for parents to explore the issues of sexuality education and the prevention of adolescent pregnancy in the family. Deaf and hearing parents of deaf children, and deaf parents of hearing children 10 years and older will spend the weekend learning how to communicate better about sexuality. Their children will participate in organized activities.

Families from throughout the Northeast coast will attend the workshop, which is one facet of an ongoing project funded by a grant from the federal Office of Adolescent Family Life Programs.

Della Fitz-Gerald, project director, said the ultimate goal of the project is to "see home and school work together in providing human sexuality information." She will conduct the workshop in tandem with her husband, Max Fitz-Gerald, sexuality education specialist at the Model Secondary School for the Deaf.

Activities for the weekend retreat will focus on breaking down communication barriers which commonly arise around the issues of sexuality. Participants will also examine the facts of

teen-aged pregnancy and the general development of pre-adolescents and adolescents as well as the emotional and moral aspects of sexuality.

The overall project was begun last fall when the U.S. Department of Health and Human Services awarded Pre-College Programs a grant to develop a sex education program for the parents of Kendall students and to look at ways to prevent adolescent pregnancy.

Through the project, the Fitz-Geralds have worked with parents and professionals to develop a parent curriculum and a handbook.

Eagles win last game of season

The Eagles pleased the Homecoming crowd by defeating the Maryland School for the Deaf 32 to 6 Saturday, Nov. 6 and concluded the season with a 6-3 record.

Model had a commanding 20 to 0 lead before Maryland could score its only touchdown of the game in the third quarter. Sean Markel scored two touchdowns for the Eagles and rushed for 121 yards on 21 carries. Bob Wilkins and Ray Brooks each scored a TD on runs of two yards and seven yards respectively and Ken McBride hauled in a 25-yard pass for another TD.

Model's defense had a banner day.

Holiday meal planned

A Thanksgiving meal will be served at Ole Jim during lunch hours Nov. 18. On the menu that day will be: Roast turkey carved to order, cranberry sauce, buttered corn, whipped potatoes, holiday breads, rolls, a beverage and pumpkin or mince meat pie. Cost of the lunch is \$4.95. The soup, salad and sandwich bars will also be open that day.

Information Day set

The Gallaudet Counseling and Placement Center will sponsor the fourth annual Graduate School Information Day Thursday, Nov. 17 from 10 a.m. to 4 p.m. in the multipurpose room of Ely Center.

Workshops on how to select, apply to and pay for graduate school will be held from 10:45 to 11:45 a.m. and from 2 to 3 p.m. For more information, contact the Counseling and Placement Center on the second floor of Ely Center.

Kendall students make TV debut

Four Primary Department students at Kendall Demonstration Elementary School were featured on the Saturday, Nov. 5 edition of "Newsbag", a television news show conducted by and for children.

Raylene Harris, Ryan Leon, A.J. Prather and Margie English demonstrated creative sign language in their performance of "Poem for a Deaf Child," which illustrated the ways one can listen with the eyes.

Raylene and Ryan also joined in a group discussion of sign language. The young hosts of "Newsbag" queried the two and Ryan helped by acting as an interpreter. The Gallaudet Television

Center made a videotape of the broadcast.

Floating Eaglefeather, KDES' storytelling artist-in-residence for the month of October, directed the four 7-year-old performers and appeared with them on the show.

The children's teacher, Jean Slobodzian, said they were so excited about the program all four gave up recess for three weeks so they could rehearse.

"Newsbag" is a locally produced children's magazine-style program aired Saturday mornings at 7:30.

The show is routinely interpreted into sign language.
